

Orthopaedic Rehabilitation

Froedtert & The Medical College of Wisconsin

Rehabilitation Services

Experienced physical and occupational therapists provide care for injury prevention and injury and post-operative rehabilitation services. Our exceptional team members focus on evaluation and treatment of orthopedic injuries for the best outcome. They provide individualized, goal-oriented care focused on obtaining objective results and patient education. At every step of the way, we use evidence-based practices.

Physical therapy is provided for musculoskeletal pain and deficits of range of motion, strength and balance/proprioception. Patients with many orthopaedic conditions may benefit from physical therapy. Common diagnoses we treat are:

- Amputee rehabilitation
- Arthritis
- Degenerative disc disease
- Deconditioning/Fall risk
- Disc herniation
- Joint replacement
- Lymphedema
- Peripheral nerve injury
- Post-fracture rehabilitation
- Post-surgical care
- Scoliosis
- Sprains/strains
- TMJ dysfunction

Our state-of-the-art facility offers the latest equipment and treatment techniques to help patients attain full recovery after surgery or an injury. Services include modalities for pain relief, range of motion, stretching, strength training, balance/proprioception training, manual therapy, PNF, postural/body mechanics education, back class, core conditioning and taping with Kinesio tape.

We offer convenient, flexible scheduling, including before and after school or work.

How to Refer Your Patient

To refer a patient for orthopaedic rehabilitation at Froedtert & The Medical College of Wisconsin, please call one of our convenient clinics. A physician referral is required for a patient to receive therapy services.
