

Transplant and End-stage Liver Disease Program

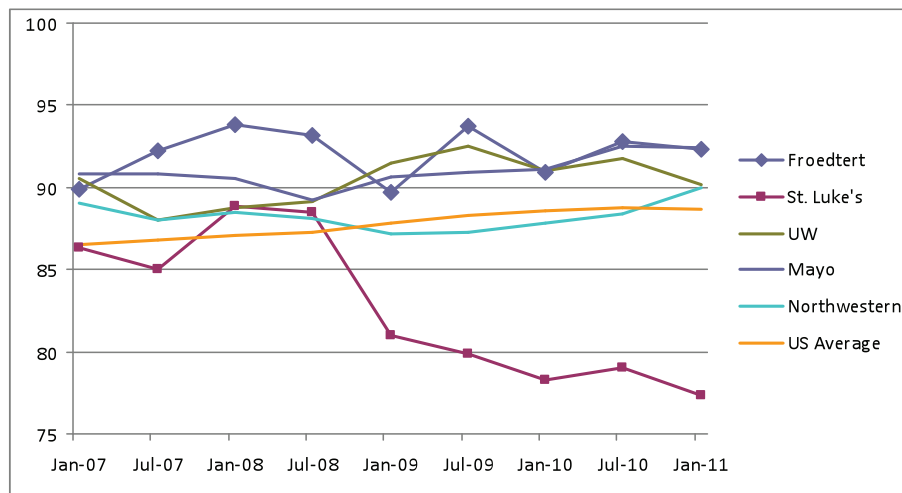

Our goal at the Froedtert & The Medical College of Wisconsin Transplant Center is to provide exceptional care to all patients using a comprehensive, team-based approach. We provide excellent, quality care for patients with all forms of liver disease and hepatocellular malignancy.

program results

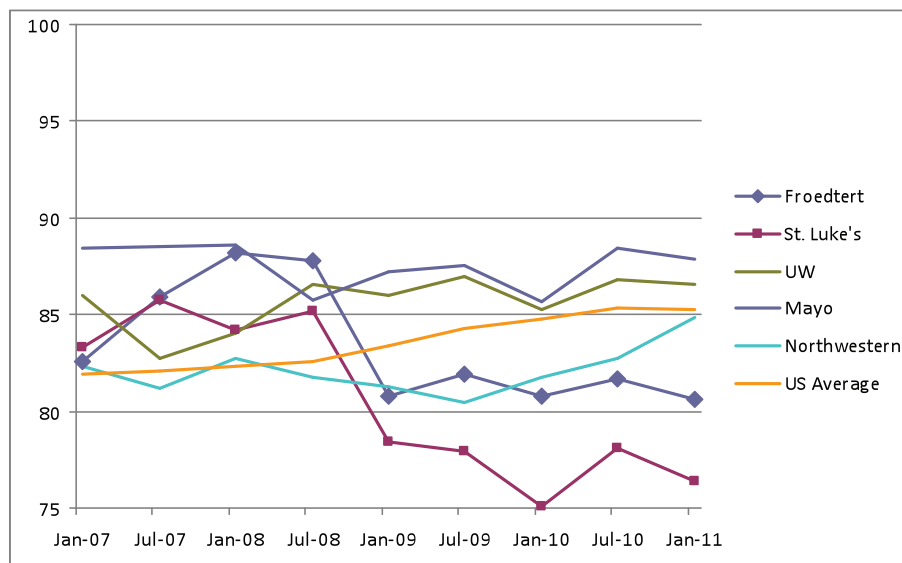

Outstanding outcomes in the region and nation

The following tables demonstrate our survival rates in comparison with other hospitals in the region and the national average. *Source: ustransplant.org, sart.org, 2007-2011*
